

SOLAR E.P.C. SERVICE:

We, "FAIRDEAL CORPORATES SALES AND SERVICES" are one of the renowned manufacturers and suppliers of a wide range of Renewable Energy Systems. We bring together all aspects of Green Power Engineering, Procurement and Commissioning (E.P.C. Services), and quality post sales services all as required by client under one roof.

With a proven track record in Solar Power Plant turnkey E.P.C. services and utility-scale domestic and industrial applications, we will work with you to deliver the most bankable solution for your renewable energy portfolio.

Our engineering, procurement, and construction (E.P.C.) team provides bankable, innovative, and reliable solar energy solutions to customers around the world. Offering "turnkey" working systems due to the set structures FAIRDEAL CORPORATES SALES AND SERVICES has in place, we are able to provide a complete spectrum of services for projects from viability studies to commissioning.

FAIRDEAL CORPORATES SALES AND SERVICES, as an exclusive E.P.C. provider, we are able to retain our position as a single point of contact for all green power needs. Our in-house team of experts strives to produce top-notch and innovative solar designs by selecting components based on highest standards in reliability, extendibility and low failure rates. Our comprehensive experience ensures cost effective engineering solutions for even the most complex projects. We have the ability to deliver projects in-budget and on-time due to our immense experience providing global EPC services. The absolute efficiency and Quality installation guarantees accelerated investment recovery.

A Single Point of Contact for All Green Power E.P.C. Services Include:

- Viability Studies
- Customised / Specific Design
- Engineering
- Permitting
- On Site Work
- Equipment / Material Procurement
- Quality Installation and Construction by Skilled professionals
- Commissioning of Roof Top Systems, Ground Mounted System or Solar Carport System.
- Timely delivery
- Quality Post Sales Services

In India Green power plants are widely used in Residential Apartments, Schools, Collages, Hostels, Farm House, Corporate Offices, Shops, Hotels, Common Lighting Systems, Clinics and Hospitals, rooftop/ground mount systems for corporate companies and industrial applications, Special Economic Zones (SEZs) for lighting, for rural electrification and other applications to provide excellent power back up systems .
