

WINDMILLS

The Micro Windmills can be used for charging your battery bank of UPS/ Inverter. It can also be used as Off-grid and On-grid power generating systems. We can supply and do the installations for Windmills and Windmill Solar Hybrid Power Generation to charge your battery bank of UPS/ Inverter as per your requirements. With the aid of modern tools and sophisticated technologies, we have been able to provide the customers with remarkable Windmill Power Plants with Backup System.

We have range of windmill starting from 0.5kw to 50kw.

3% Facts of Windmills:

- The sun radiates 100,000,000,000,000 KWH energy to the earth per hour.
- 3 % of the energy coming from the sun is converted into wind energy.
- 3 % of the above wind energy can meet the energy* demand of the "WORLD TODAY".
- Provided we can harness from "CLASS I" winds and upward.

Why Micro Windmills?

WORLD BANK'S SURVEY SAYS

- Only about 12-15 % of the World's Land Mass has potential for large Multi-Megawatt scale wind power installations.
- About 20-25% isn't any good for Wind Energy.
- A whopping 60-65% has potential for small scale Wind Energy !!! Plus++
- You don't need roads...!!
- You don't need cranes ...!!
- Less or Almost Maintenance Free...!
- Unattended operation...!
